All counties, towns, cities, villages, etc., are indexed in the following manner:

(See map of Kansas.)

	Pop. '80.
<b>Burlington</b> , Coffey, P-37, (Rys 21- <i>e</i> ,	
32- <i>i</i> ) *† Δ + . . . . .	2011
California, Lane, 9 m N W Alamota,	
N-10, mail Juniata.	

Burlington being in black type indicates that it is the county seat of Coffey county; P-37 shows where it can be found on the map (see example below); (Rys 21-*e*, 32-*i*), that it is a station upon each of these railways, 21 and 32 and branches *e* and *i*, (see list of railways, which are consecutively numbered and alphabetically arranged); \*, that it is a money order postoffice; †, that it is a telegraph station; Δ + refer to the express companies as shown above; 2011 is the population given according to the latest official census.

California is in Lane county, nine miles northwest of Alamota, and mail for this place should be sent to Juniata Postoffice.

The letters and figures following names (like P-37 above) refer to that point on the map at which lines drawn from marginal figures top and bottom, and letters upon either side of map, would cross each other at right angles.

For example, to find "New York City, D-5;" let the diagram below represent the map. New York is seen near the crossing of lines D—D and 5—5.
